harmony

EN How to read the colour name
IT Lettura del nome colore

EN Architop® can be made using Colour Pack-C dye combined with the neutral or pewter Colour Hardener, or using the already coloured powders of the colour hardener. In this table Architop®'s standard shades are divided by colour line according to Ideal Work's colour scheme. Each colour can be combined tone-on-tone horizontally or with different colour groups vertically.

The colours listed in this page are only indicative; Ideal Work authorised applicator will create an ad hoc sample for you to see and touch the colour and finish you would like to choose.

IT Architop® può essere fatto usando il colorante Colour Pack-C unito al Colour Hardener neutro o pewter, oppure usando le polveri già colorate del corazzante. In questa tabella i colori della collezione standard sono divisi per linea cromatica secondo lo schema colori Ideal Work. Ogni colore è combinabile tono su tono in orizzontale e tra i differenti gruppi di colore in verticale.

I colori riportati in questa pagina sono solo indicativi, sarà poi l'applicatore autorizzato Ideal Work che realizzerà un campione ad hoc per poter vedere dal vivo colore e finitura.
